

## OPTIMIZING WOMEN'S HEALTH PROGRAMS

**DR. ROBERTA KLINE is a highly skilled strategist and program developer for the medical care and women's health technology industries. Her commitment to organizing complex projects and distilling technical information offers an invaluable leadership role to any multi-disciplinary assignments.**

With over 20 years of experience as owner of several ObGyn practices and a co-founder/CEO of a biotech & clinical institution, Dr. Kline consistently leveraged her experience-based skill set to execute the many essentials of health-related business operations. She is recognized within collaborative roles, uniting teams and optimizing the performance of clinical and health-based programs.

As a technical officer, Dr. Kline offers an innovative approach to problem-solving and translating cutting-edge science into accessible and relevant applications. Her award-winning research work in women's health issues provides deep insight to groundbreaking reports for the academic society. Her effective presentation style, as demonstrated through her published works and dynamic lectures highlights her ability to engage with a wide set of audiences including stakeholders, professionals and end users about the adoption of innovative products and services.
